## WHAT IS MY RISK TOLERANCE?

Date: April 23, 2025

#### INTRODUCTION

On your way home from work, do you drive in the slow lane or the fast lane? Each person has a different propensity for risk. When investing, this risk propensity can be used to determine the percentage of your portfolio that is exposed to equities. Complete the following questionnaire to help determine your risk profile.

## SUMMARY OF INPUT

1. What is your age? A) 35 years or under B) 36-54 C) 55 or above	A
What do you expect to be your next major expenditure?     A) Buying a house     B) Paying for a college education     C) Capitalizing a new business     D) Providing for retirement	A
3. When do you expect to use most of the money you are now accumulating in your investments?  A) At any time nowso a high level of liquidity is important  B) Probably in the future2-5 years from now  C) In 6-10 years  D) Probably in 11-20 or more years from now	C
4. Over the next several years, you expect your annual income to: A) Stay about the same B) Grow moderately C) Grow substantially D) Decrease moderately E) Decrease substantially	С
5. Due to a general market correction, one of your investments loses 14% of its value a short time after you buy it. What do you do?  A) Sell the investment so you will not have to worry if it continues to decline  B) Hold on to it and wait for it to climb back up  C) Buy more of the same investmentbecause at the current lower price, it looks even better than when you bought it	С
6. Which of these investing plans would you choose for your investment dollars?  A) You would go for maximum diversity, dividing your portfolio among all available investments, including those ranging from highest return/greatest risk to lowest return/lowest risk  B) You are concerned about too much diversification, so you would divide your portfolio among two investments with historically high rates of return and moderate risk  C) You would put your investment dollars in the investment with the highest rate of return and most risk	В
7. Assuming you are investing in a stock, which one do you choose? A) Companies that may make significant technological advances that are still selling at their low initial offering price B) Established, well-known companies that have a potential for continued growth	
C) 'Blue chip' stocks that pay dividends	В

This information may help you analyze your financial needs. It is based on information and assumptions provided by you regarding your goals, expectations and financial situation. The calculations do not infer that the company assumes any fiduciary duties. The calculations provided should not be construed as financial, legal or tax advice. In addition, such information should not be relied upon as the only source of information. This information is supplied from sources we believe to be reliable but we cannot guarantee its accuracy. Hypothetical illustrations may provide historical or current performance information. Past performance does not guarantee nor indicate future results.

8. Assuming you are investing in only one bond, which bond do you choose?  A) A high-yield (junk) bond that pays a higher interest rate than the other two bonds, but also gives you the least sense of security with regard to a possible default  B) The bond of a well-established company that pays a rate of interest somewhere between the other two bonds  C) A tax-free bond, since minimizing taxes is your primary investment objective	С
9. You expect inflation to return and it has been suggested that you invest in 'hard' assets, which have historically outpaced inflation. Your only financial assets are long-term bonds. What do you do? A) Ignore the advice and hold on to the bonds B) Sell the bonds, putting half the proceeds in 'hard' assets and the other half in money market funds C) Sell the bonds and put all the proceeds in 'hard' assets D) Sell the bonds, put the proceeds in 'hard' assets, and borrow additional money so you can buy even more 'hard' assets	В
10. You have just reached the \$10,000 plateau on a TV game show. Now you must choose between quitting with the \$10,000 in hand or betting the entire \$10,000 in one of three alternative scenarios. Which do you choose?  A) The \$10,000 you take the money and run B) A 50 percent chance of winning \$50,000 C) A 20 percent chance of winning \$75,000 D) A 5 percent chance of winning \$100,000	А

# **ANALYSIS**

Here are the results of your risk profile questionnaire. The possible risk profiles are Very Defensive, Defensive, Conservative, Moderate, Moderately Aggressive, Aggressive, Very Aggressive. Your risk propensity suggests a Moderate risk posture. Here is how the scores were tallied.

## **Risk Profile Summary**

Moderate		
1	6	
2	2	
3	6	
4	10	
5	10	
6	6	
7	6	
8	6	
9	6	
10	2	
Total	60
