A photograph showing the silhouettes of three people fishing from a wooden dock on a body of water during a golden sunset. The sun is low on the horizon, creating a warm, orange glow across the sky and water. The silhouettes of the people and the dock are clearly visible against the bright background.

SOURCES OF RETIREMENT INCOME

Today, two traditional sources of retirement income - Social Security and company pension plans are figuring less and less in people's retirement planning. By some estimates* these two sources will provide just 20 to 25 percent of what those in the middle-to-upper income group will need to live comfortably when they retire. The forecast is cloudy for Social Security. Some actuaries believe either the system is going broke and will be out of business before today's younger workers come close to retirement age, or Social Security will provide only a marginal contribution to the incomes of those other than the poorest retirees.

*Sources: EBRI Notes September 2004 Vol. 25, No. 9; Aon Consulting's 2008 Replacement Ratio Study

ROADBLOCKS TO RETIREMENT

Inflation: Inflation is constant, steady erosion of money's value. The amount of erosion varies - in some years the rate of inflation is higher than in others. But the effect of inflation never changes: the cost of living keeps going, so you may need more money just to break even.

Taxes: Just as inflation can erode your savings, income taxes can have a dramatic effect on your total return, negating as much as a third of your earnings. Consider carefully your savings vehicles to minimize "tax-bite" and maximize earnings. Consult your tax advisor with any questions on taxation issues.

Procrastination: By far the most dangerous of retirement roadblocks is procrastination. Each year that saving is postponed you lose the advantages of compound growth in that year. In exchange for a higher standard of living now you may deteriorate your standard of living during retirement.

RETIREEES MAY HAVE INADEQUATE SAVINGS

Having enough money for retirement can be one of the biggest financial concerns among Americans today. According to a recent survey by the Employee Benefit Research Institute, 70% of people polled said that future retirees will be financially "worse off" than current retirees. Almost the same number, 68 percent, think the percentage of elderly people living at or below the poverty line will increase in the future because of inadequate savings.

Some of this pessimism - particularly among younger people - comes from low expectations about the future of Social Security. Seventy-two percent of people think their benefits will be cut off or even eliminated altogether by the time they retire.

ASSET ACCUMULATION

With regular contributions to a savings plan(s) and the effects of compounding interest, your retirement assets can accumulate to \$0 by the time you are ready to retire!

AGE

GROWING RETIREMENT INCOME NEEDS

Unfortunately, just as your assets grow over time so do your retirement income needs. It may surprise you how much inflation can impact your retirement income needs.

TODAY:	\$100,000
RETIREMENT:	\$100,000
END OF RETIREMENT:	\$188,454

IMPORTANCE OF PLANNING

Careful planning can help you realize your financial goals and help you maintain the same standard of living you are accustomed to during your retirement years.

On the other hand, lack of planning may prevent you from achieving your retirement goals. You may have to 'tighten your belt' in later years of retirement as your retirement income needs exceed your retirement income and you are forced to make withdrawals from your retirement funds.

April 23, 2025

RESULTS AND RECOMMENDATIONS

Based on your current assumptions it appears that your annual after-tax retirement objective of \$100,000 per year (in today's dollars) would not likely be met. The sooner you take action to address your shortfall the easier it will be to adjust your finances and/or expectations.

POTENTIAL SOLUTIONS

To meet your after-tax retirement objective of \$100,000, consider the following potential solutions:

- Reduce your income expectations.
- Seek to improve your expected returns.
- Consider postponing your retirement.

INCOME SUMMARY (TODAY'S \$)

First Year Goal Desired	\$100,000
Current Plans Provide	\$99,936
Average Annual Shortfall	\$64
Goal Income Replaced	100%
Gross Income Replaced	100%

These projections are hypothetical. This information is meant to provide you with a general idea about your retirement income needs. If you ask us to effect securities transactions for you, we will be acting as a brokerdealer. Please see the Oppenheimer & Co. Inc. website, www.opco.com or call the branch manager of the office that services your account, for further information regarding the differences between brokerage and advisory products and services.

A note on certain calculations:

Social Security. Unless the override provision is chosen, Social Security benefit estimates are calculated solely based on the current year's income and then projected forward to retirement using the Social Security inflation factor provided. Adjustments are made for early or late retirement age as compared to the Social Security defined Normal Retirement Age. Spousal Social Security benefits are calculated using the greater of 50% of the calculated client benefit or 100% of the spousal benefit based on spousal income, if any. Total benefits are then subject to the Maximum Family Benefit and reduced, if necessary. Eighty five percent (85%) of Social Security benefits are included in the taxable income and are taxed at the provided post retirement tax rate.

Income Replacement Ratio. Income replacement ratio is the percentage of your current income, as adjusted for inflation, that is estimated to be replaced by your retirement savings.

Pension Payments. If you have indicated that you will receive an annual pension payment, that amount will appear in the "Annual Pension Payment" column in the Details of Distribution Phase on p.7 of this report. If you indicate that you will receive a lump sum pension distribution, the calculator will assume that those assets will be rolled into a traditional IRA and will be included in your qualified assets, to be distributed as needed on the Details of Distribution Phase on p.7 of this report.
